Challenge #289: Prep a Shoe List

A solution to last week's challenge can be found [here](#).

For this week's challenge, let's do a bit of data preparation using shoe inventory data!

The following dataset contains a list of shoes with an ID, colors, and sizes available.

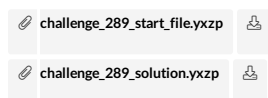

For this challenge, you want to clean the inventory data and reorganize the list to have:

- A new ID number
- The size
- A comment stating how many colors are available, and
- Three columns for color

Keep in mind that the names of the colors are separated by the sign /.

"Women Shoe Store" by MyStockPhotos is marked with CC0 1.0

Nice quick challenge for this week. Not sure that shoe ID 1533 has 3 colours available though
