Challenge #98: SANTALYTICS 2017 - Part 2

[TaraM](#)
Alteryx

Decorate the table with colors so bright.
Blocking tools, macros, yellow threads alright!

With the image files added to our Tool Data from [Part 1](#), create a unique periodic table of Alteryx tools visual that Santa can replicate en masse from year to year!

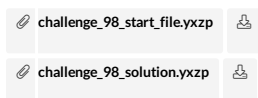

Goal: Make a periodic table of Alteryx tools with the visualization or reporting suite(s) of your choice and the provided tool data with image assets. Remember, our solutions need to dynamically update from Santa's new tool data each year!

Looking for a jump start or a refresher for your reporting skills? Register for our [Introduction to Reporting](#) live training this Tuesday!

If you are just checking out #SANTALYTICS for the first time, please read our intro [blog](#) to see our team rap, learn about the badge, and maybe get a shot at some SWAG! Check out last week's solution [here](#).

Provided: Exercise 1's Tool Data and Image Assets.yxdb

Looks great on screen, but I can only get it to render properly as html output. Even though I choose 8.5 by 11 it is huge!

I am exhausted after that one! I was receiving all sorts of PCXML errors; however, I was finally able to produce an HTML output that looked like I wanted.

EDIT: I tried to stay as true as possible to the [periodic table of Alteryx tools](#). I don't believe the small image backgrounds were included with the challenge so I created those.

Thanks for the heads up regarding the output format, had the same issue. Had no time to look for an option to add the small background image.

My solution! I took a cue from [@patrick_digan](#) creativity in the last round and added a few "elements" to give it some extra spirit... :)
