Challenge #322: Good Ladies Heist

AYX Academy
Alteryx

A solution to last week's challenge can be found [here](#).

Welcome to the Good Ladies weekly challenge!

Five women heist a jewelry store and steal a precious gem in the shape of a ball of yarn.

In the dataset, the 5 women responsible for the heist have been negligent and left clues behind. You are the detective on the case who is looking for these clues in a dataset.

1. Fingerprints on the glass surrounding the gem show fingerprints belonging to someone with the letters "Fled" in their first name or last name.
2. IT Department at the police is able to find that the back door lock password was changed to "ugfsjsjh".
3. The vault holding the gem was blown open with "dynamic" dynamite. Found in the rubble is a business card piece. You can make out the first few letters of the word "Bogi"
4. The security guard's witness statement states that he has been vigilant about watching the store. There was only one instance last week when he was distracted by a woman with Brunette hair who worked at a wireless store. He remembered later that she'd dropped a handkerchief that had the initials B.K. on it.
5. A slogan was left behind that said, "Those that synergize together can accomplish much and receive the TORPHY."

First, you will have to parse the data.
