## Challenge #249: Highlights

A solution to last week's challenge can be found [here](#).

Have you ever reviewed a test and marked the wrong answer, only to realize that you overlooked the correct answer when evaluating your options? Humans are fairly unreliable when reading in data, especially when it isn't in a friendly format. Computers on the other hand...

For this week's challenge, create a workflow that identifies and highlights the largest value from a table of values. It should highlight only one value.

Ok ok ok - having seen most everyone else's solution...I clearly need more post-holiday coffee because where everyone else used one tool, I used TWO to think through the steps needed. Ha!
