Challenge #320: Women Representation in Politics

A solution to last week's challenge can be found [here](#).

All over the world, women are taking an active role in politics and public policies decision-making.

In this challenge, use two datasets to discover what are the five top countries in South America that have the most female political representation in national parliaments in 2019.

Then create a chart of your choice to showcase your findings and showcase the Female Political Representation in National Parliaments in South American Countries by 2019.

The first dataset contains information about the percentage of women's proportion of seats in national parliaments. The second dataset provides a list of the continents, country and regions.
