## Challenge #218: Car Sales Reporting

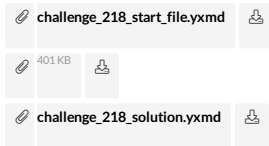

A solution to last week's challenge can be found [here](#).

In this week's challenge explore the reporting tools to help Arnold create a visualization for his car sales last month.

Arnold at Platinum Motors would like to get a better picture of his car sales from the last month. Using the provided dataset, create a report that shows the locations of the buyers, color-coded by the type of car purchased, with a legend. Underneath the report, put a table that shows the number of sales and average sale price by car type.

I love all that you can do with maps in Alteryx (now that I actually know how to use this tool).

This was a good challenge. Not particularly difficult, but with a few elements that I think all Alteryx developers should have in their toolkit.
