Challenge #32: Alteryx '16 Grand Prix (Race 2, L2)

GeneR
Alteryx Alumni (Retired)

This is the final lap in the Grand Prix series, last week's (challenge #31) solution is posted [HERE](#).

Here is the Scenario for this lap: Now that I know the best four locations for me to visit (from last weeks exercise), I want to estimate how much it's going to cost for me to take an Uber to each of the sites. If I start at this hotel, and head to the northern most location and head south to visit each surf site, how many miles will I drive? If Uber is \$1.10 per mile, how much will that cost me?

The objective is to: Identify the total drive distance from inspire to the northern point and work south to visit all four sites ending at the last site. Calculate the Uber estimate.

*Remember to time yourself, contestants only had about ten minutes per lap.

About 9 minutes this time...

► Spoiler

Thanks for posting all these great fun to see what they did (and fun to learn new stuff...)

Feels like a few too many tools, but it worked... Aaaaand I didn't see the whole thing about the timed challenge part (since I'm doing these Grand Prix ones out of order), soooo I'm going to go with approx. 15 minutes? :)

Completed this one on my flight to San Diego!

Note: I don't have drive time data so my solution may be different to the one provided.
