## Challenge #85: How Did Tara Place in Competition?

JoeM  
Alteryx Alumni (Retired)

Last week's solution can be found [HERE!](#)

A few week's ago [@TaraM](#) competed in the Gladiator Games - an event that tests a competitor's overall fitness capacity in different capacities like endurance, strength and agility, intervals, and metabolic condition.

Tara (bib # 2421) raced against her friend Carisa (#3508) in all 4 events but was only accidentally scored for 3 by the time keepers and her overall rank suffered. In the Interval event, Tara knew her time was exactly 1 minute faster than her friend, Carisa.

If the place is determined by the lowest average position for all 4 events, what overall place should Tara be? What was her place in the interval event?  
Anybody who does not have all four events should not be ranked.

I didn't get the same solution as what was in the file, so I look forward to seeing what I did wrong!  
Edit: Fun challenge.

Solution is attached. Like [@patrick\\_digan](#) I did not get the same place as the solution, so interested to see what I could have done differently!
