## Challenge #272: Configure It Out

A solution to last week's challenge can be found [here](#).

If you've ever attempted to troubleshoot someone else's workflow, you know that it can be challenging. Do you see where this is headed?

For this week's challenge, someone was clever enough to create a workflow that generates a chart representing the nationalities of team members for the 7 top teams in the German Bundesliga. They also included some statistics about the top 3 goal contributors on each team. The workflow is in place but isn't working. Can you Configure It Out?
