Challenge #201: Wage Ain't Nothin' but a Number

This challenge focuses on charting the changes in the minimum wage over time since 1968.

For those not familiar, the minimum wage is the lowest hourly wage allowed by law. In the United States, there is a federally mandated minimum, but each state is allowed to enforce their own minimums. Below, you will find a file containing minimum wage data from 1968 - 2017 by state. The Text Input tool classifies each state into a region.

Use the inputs to create an (interactive) chart showing each region's average minimum wage by year.

Go Chiefs!

Not quite sure how to check this against the result we were given to make sure everything is correct...

I guess the purpose of this exercise wasn't to get the exact output, but to get us playing with the interactive charting tool, in which case mission accomplished, and definitely better from the last time I used it!
