Challenge #171: 2019 Grand Prix US - Heat 2

JimmyG
Alteryx

You've completed Heat 1 and it's time to move on to Heat 2! This heat is all about data prep/calculations for the analysis in Heat 3. Much like last week, give yourself 2-3 minutes to read through the instructions before you start the timer. You don't have a pit crew to help, but at the 11-minute mark you may use the workflow in the "Turbo Boost" Tool Container that is about 75% of a suggested solution.

If you'd like to see the action of the 2019 Grand Prix in Nashville, check our This Blog that gives a quick recap and contains a video recap.

Good luck!

It's a little easier to work through the problem the second time around

Even though I was not in Nashville, I watched the video a couple of days ago; time flies building the workflow; it sure took me all 11 minutes. Kuddos to the competitors.

Solution is attached.

Reading the background was helpful in determining how to sort the records for the final output (e.g. Not just by overall rank, but by number of households in order to maximize the volunteers). Definitely a fun exercise!

Just over 6 minutes to complete and join against The Answer. As I got ready to post I remembered the Answer Check macro, LOL.
