Challenge #130: Is There an Echo in Here?

JoeM
Alteryx Alumni (Retired)

You have a source system that doesn't seem to be working quite as expected. The system will frequently take any given word and duplicate it within a string. You job is to clean it up! Below we have a few sample phrases that are indicative of the system's problem. Find all words that have duplicate consecutive words and reduce the duplication to a single word again!
(Advanced Users: There is a one tool solution for this!)

Deja Vu anyone anyone?

Will have to look at those one-tool solutions - Impressive!

For this one I had an immediate idea to solve it a certain way --- which worked!
