Challenge #181: Ingredients of an Old Southern

🛡️ⓐ AYXAcademy
Alteryx

A solution to last week's challenge can be found here!

This week's challenge comes to us from ACE @patrick_digan.

Using the provided URL, download and parse the data in the recipe for an Old Southern. Create a list of the cocktail ingredients and measurements.

Whiskey (and other spirits) and analytics go surprisingly well together. Head on over to our Events page to join an evening of whiskey tasting and data sampling near you.

I prefer my analytics shaken…not stirred.

Similar to @kat just some different words in the formula tool.
Fastest I've gotten a kick at the can

Looks like my company's proxy blocks the Download tool (I'll need to research the work-around for that later) so for now I just copied the URL's text into a Text Input tool and worked from there.

Quick challenge. Put to work what I learned in the webscraping class at #Inspire19. I might create an app from this website. Now what's my drink...
